We followed the notes US prepared- see EH Schedule of responses and replies showing how they had been incorporated to date into NPv2 or remained open to discussion at this meeting.

General satisfaction on most points with amendments made or to be made.

Work to be done:

- GP hasn't had time to read in detail so may have drafting points later.
- Strategic Environmental assessment and habitat assessment discussed; GP will send model form,
- Consultation statement to be drawn up by US- include CF?
- Clarify evidence base especially additions to CF,
- Local Green Spaces Justification statements needed.

Preplanning for the Quality Review Panel.
